

# AIR COMPRESSOR QUICK START UP GUIDE

Model: C304H  
SKU: 1005020236

**START**

**1**

Product is shipped with oil in the crankcase. Ensure that the oil level meets the center of the red dot on the oil sight glass. Consult your manual for oil fill instructions.

**2**

Ensure the switch is in the OFF (0) position

**3**

Pull the ring on the safety valve to release air (if any) for about 20 seconds. Release the ring to close.

**9**

Adjust the pressure regulator by turning in a clockwise direction to the working pressure of the tool.

**8**

Turn the switch to the AUTO (I) position. After starting, wait until the compressor shuts off before using.

**7**

Plug in the power cord. Use of an extension cord is not recommended with this product. Please use a longer hose instead.

**6**

Attach air hose to the quick coupler (air hose and accessories NOT included)

**5**

Close regulator knob by turning in a counterclockwise direction until the outlet pressure reaches zero.

**4**

If needed close the drain valve by turning in a clockwise direction. Drain tank after every use.
