

EDGE™

MEMORY

Over 26 years of industry experience!

Specializing in critical memory upgrades & SSD solutions.

EDGE Memory is a leading U.S. supplier of memory upgrades, storage devices and solid state drive technology. With over 26 years of industry experience, we specialize in server solutions, datacenter, & large-scale corporate projects. In addition, we have a wide selection of client and small business solutions. Regardless of the system type or project scale, we have the ideal upgrade to meet your memory & storage needs.

EDGE Quality

EDGE products are produced in our state-of-the-art ISO-9001:2008 facility. Our highly developed testing process is specifically designed to ensure all products are 100% tested for compatibility. In addition, EDGE utilizes CMTL labs to test specific EDGE memory in Intel motherboards and guarantee compatibility. View EDGE CMTL/Intel® advanced tested memory here: www.cmtlabs.com/edge.

Innovative Products

Our award winning engineering team leads the market in development of cutting-edge new SSD and memory solutions. We take pride in the ability to offer our customers exciting, first-to-market products and technology.

World's first
2TB SATA III SSD!

U.S. Manufacturing

Located in Texas, all EDGE manufactured memory products are assembled in the United States. EDGE is backed by the largest producer of domestically assembled 3rd party modules in the U.S.
