Personalized performance information is provided to account holders as a general approximation of the overall recent performance of your account. It is calculated based on a formula which estimates the equivalent rate of return during the stated period, based on the opening balance, transaction activity including any applicable fees, and closing balance. Income received in the stated period will be included; income due but not received will be included in the following period. Performance calculations will not include loan balance. Due to the transaction activity in the account, overall performance may not equal individual performance returns published by the investment options in the plan. Past performance is not a guarantee or prediction of future investment results.
