

a bot being done in
docker, possibly w/ ubuntu
16.04

Possibly just the buildroot

Putting together a list
of coherent questions for lance

can rick give me an idea
of what is "dead" and what
is still getting ~~done~~ done on

WRT the SW directory

digging into buildroot
- think it will work on
modern ~~userspace~~ userspace

~~the~~ userspace plan
formulating

32-bit VM? ^{Scripto} btrfs stub
for gentoo?
